 - Mention which method is faster.
 - Give two advantages of using the faster method.
- The **Tools** panel of Flash CS3 is shown on the left. Answer the following questions in relation to this.

		<p>a. Name the two options of the Magnifier Tool. Also write the use of these options.</p> <p>b. Identify the stroke and fill colors selected in the Tools panel.</p> <p>c. Which tool will you use to select irregular areas on the stage?</p>
4.	Preparatory Work for Units/ Chapters to be covered after	<p>Arsh wanted to draw two circles, but the circles got overlapped by mistake. When he tries to separate the circles, he observes that a part of the upper circle gets erased as shown in the figure.</p> <p>a. Which drawing mode was selected in Flash?</p> <p>b. Name the drawing mode that Arsh should have used.</p>  <p>The diagram illustrates a drawing error in Adobe Flash. On the left, two circles overlap: a larger purple circle with a dark red stroke and a smaller yellow circle with an orange stroke. On the right, the circles are separated, but the purple circle is now a semi-circle, indicating that the overlapping portion was removed. This happens when the 'Merge' or 'Join' mode is used instead of the 'Separate' mode.</p>
